

SAY NO
TO VIRUSES, WORMS,
SPYWARE, IDENTITY THEFT
AND EVIL INTERNET SITES.

INTERNET SECURITY 2011

Our brand promise, "Protecting the irreplaceable," captures the very essence of what we do and raises it to the highest level of importance. Every piece of digital content, every password, every trusted on-line relationship, is irreplaceable. No file is treated as less important than another. F-Secure® Internet Security™ 2011 incorporates a user-centered design and offers better security online without slowing down your computer.

Several protection layers against threats

The layered levels of protection in F-Secure Internet Security 2011 provide protection from using files to browsing the Internet. The Browsing Protection feature tells you clearly which web sites are safe to enter and which to avoid. The cloud-enabled antivirus has multiple scanning engines that detect harmful files and malicious content on your computer.

DeepGuard™ cloud computing technology ensures the fastest protection against all new threats. All features can also provide protection without a working network connection, relying on local decision logic.

Protection built on reputation services

The amount of unique malware is growing fast. The amount of web sites is also growing at an amazing rate. Protection that is based solely on obtaining a copy of a malware file or analyzing a unique URL is no longer sufficient.

To make sure that you are protected against modern and complex threats, we are constantly improving our detection and protection technologies. F-Secure Internet Security 2011 can make more sophisticated and accurate decisions based on how common certain files are. With this information, F-Secure Internet Security 2011 can automatically determine if the file is malicious or not. You can also view this information whenever you need it.

Key Features

Protects your computer against all types of malicious software

Delivers real-time protection against viruses, spyware, worms, trojans, rootkits and zero-day attacks. Automatically updated protection from the world-renowned F-Secure Labs. F-Secure DeepGuard cloud protection against unidentified threats ensure you can safely use your computer, now and tomorrow.

Safe surfing for you and your children

The new Browsing Protection feature tells you which websites are safe to enter and which you should avoid. Harmful sites are blocked automatically to ensure safe surfing while renewed Parental Control keeps children safe from inappropriate web content.

Detects and removes spyware from your computer

F-Secure Internet Security removes secretly installed software from your computer ensuring that your system is running smoothly and clean of spyware.

Protects your computer against hackers

Keep your private data to yourself, thanks to the cutting-edge personal firewall that stops hackers from breaking into your computer.

Helps you stay free from spam e-mail and phishing attempts

Automatically detects and filters spam and e-mail schemes designed to steal your private information.

Easy to Install and Use

F-Secure Internet Security is extremely easy to install and use. As the software is highly automated you do not have to understand the complexities of data security. The completely redesigned user interface based on extensive usability studies sets a new standard in safe PC use.

The Fastest Protection Against All Threats

Frequent automatic updates and advanced DeepGuard cloud computing technology ensure the fastest protection against all new threats. Immediate reaction times and fast cures during new and emerging threats are guaranteed by F-Secure Labs working 24 hours a day worldwide.

Software in Your Language

F-Secure Internet Security has a clear user interface, including an easily accessible electronic manual. Both the software and electronic manual are available in your language.
