

# CLIENT SECURITY

## COMPLETE ENDPOINT PROTECTION FOR BUSINESS

It's common knowledge: desktops and laptops are your weakest link. Client Security provides total endpoint protection to prevent malware from reaching your network.

F-Secure Client Security includes award-winning protection, heightened security for sensitive activities like banking, automated software patching for more than 2,500 3rd party applications, and much more.

## PROTECTING ENDPOINTS

is the single most important security measure you can take

- ✓ Prevent business interruption
- ✓ Save time with automatic patch management
- ✓ Boost security and productivity with enforceable Web content controls

# CLIENT SECURITY

## A WHOLE LOT MORE THAN ENDPOINT PROTECTION

In addition to complete endpoint protection, Client Security saves you time with automatic patch management and boosts employee productivity with Web browsing controls. Client Security\* offers:

### Software Updater

Automatically updates Microsoft and 2500+ 3rd party software apps

### DeepGuard

An intelligent anti-malware engine offering 0-day detection capability

### Web Content Control

Improves security and productivity with controlled access to websites

### Connection Control

Activates additional security for sensitive transactions such as online banking

### Real-Time Protection

Protects against new malware detected across the globe within 60 seconds

### Multi-Engine Anti-Malware

Provides unmatched protection with highly advanced, multi-engine anti-malware

### Browsing Protection

Proactively prevents employees from accessing harmful sites, links or content

### Firewall & Intrusion Prevention

An extra layer of protection works dynamically with Application Control

### Device Control

Controls USB device access

\* Client Security is available in two versions, Premium and Standard
